1. INTRODUCTION

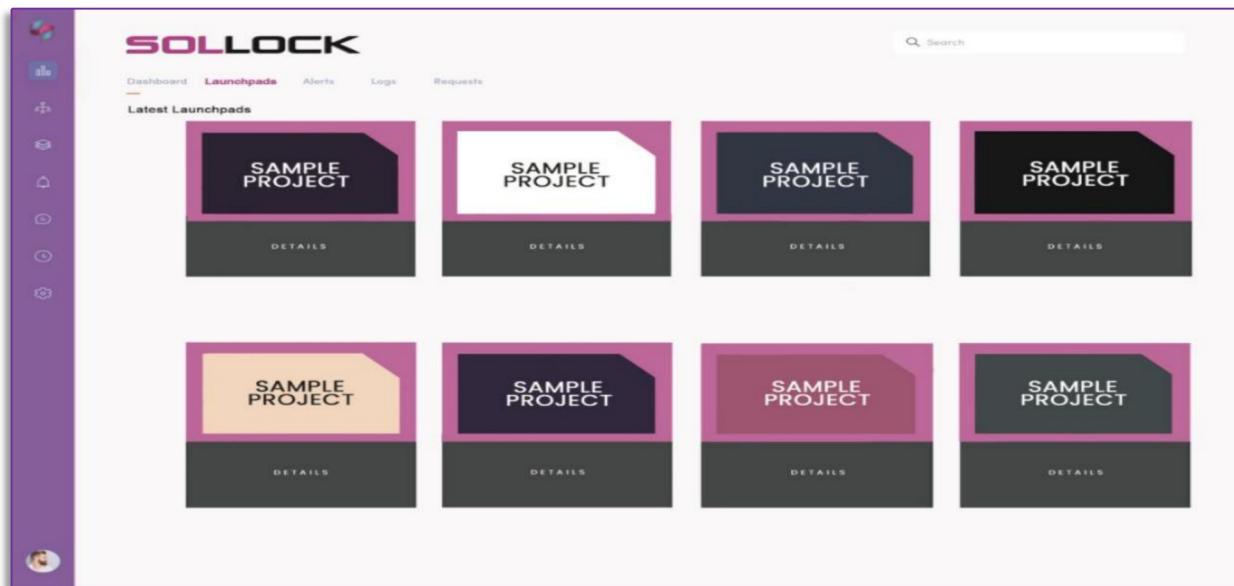

We cannot deny that the Solana ecosystem is one of the most successful and fastest growing projects today. With quicker and much lower fees, we cannot deny that it is currently the best alternative to ethereum. However, despite being one of the fastest growing ecosystems, we have found that it lacks an infrastructure that will keep the Solana ecosystem secure, which The SOLLock will provide.

1.1. WHY CHOOSE SOLLOCK?

SOLLock was created to provide a secure working environment for developers and investors. as the name suggest. The platform will be incharge of presale, fundraising, liquidity and team funds locking for any spl based projects.

2. SOLLOCK Platform Offers

NOT YET OFFICIAL

2.1. SOLLock Slocker

A decentralized platform that allows users to lock up any SPL-based token instantly. You can choose when it will be vetted, e.g. 20% quarterly, 100% after 90 days, or you can lock it forever.

The screenshot shows the SLOCKER homepage. At the top, there's a purple header with the SLOCKERS logo, navigation links for TRENDING, STACKING, EXPLORE, and CREATE, and a CONNECT TO WALLET button. Below the header is a search bar labeled "SEARCH SLOCKER". The main title "SLOCKER" is prominently displayed in large white letters. Below the title is a table showing the total value locked for various token pairs:

NAME	TOTAL VALUE SLOCKED	TOKENS LOCKED	TOKEN PRICE
BNB / WBNB	\$464,214	1,243.75 (7.32%)	\$373.24
ALCH / WBNB	\$1,726	608.71 (99.46%)	\$2.84
CAKE/ WBNB	\$53,764	79,600 (0.00%)	\$0.6754
BTCB / BUSD	\$11,998	8.32 (44.14%)	\$1,441.27
BTCB / BNB	\$772	11.27 (90.61%)	\$68.48
DAI / BNB	\$222	199 (96.99%)	\$1.11

BNB / LADP	2555	9,663.96 BNB	11.12
BNB / BTB	2775	8,934.06 BTB	84.82
BTCB / BTB	888,112	9,451.44 BTB	75.14412
BNB / DAI	40,162	40,000.00 DAI	20.9134

2.2. SOLLock SlockSwap

SlockSwap will be the bridge for a fast and more secure exchange, all projects that will be listed on our SlockPad will be automatically listed on SlockSwap.

SlockSwap has 2 features SlockFarm & SlockStake that are expected to be available in Phase 3.

2.3. SOLLock SlockPad

SlockPad is a decentralized fund raising platform for investors. It is a bridge between high quality new projects and investors before the project gets publicized. It also has an auto locking/vesting mechanism for project owners to insure a rug proof ILO for investors and for them to be fully dedicated developing to their projects.

2.4. SOLLock SlockFarm

SlockFarm is a yield-farm programmed to take at least 4% as deposit fee for all of its users.

2 percent of the amount will be spent on buyback and Burn. 1% of the total would be pooled or added to existing pools. Marketing and development will receive 1% of the budget.

The screenshot shows the SOLLOCK platform interface. At the top, it displays "Your earnings" with a pending harvest of 5.0122 and a "HARVEST" button. To the right, it shows "Total Value locked" at \$25,785,261,25, with a "Burn rate" of 2%. Below this, there are three liquidity provision options: "SLOCK-BUSD LP" (85.18%), "SLOCK-1INCH LP" (68.26%), and "SLOCK" (\$500,000). A search bar and a dropdown menu for "TVL" are also present. The bottom section lists two farms: "SLOCK-BUSD" (85.18%, \$1,280,086,17, Harvest: 5.0122) and "SLOCK-BTCB" (46.23%, \$1,280,086,17, Harvest: 0.00), each with "Provide Liquidity" and "Harvest" buttons.

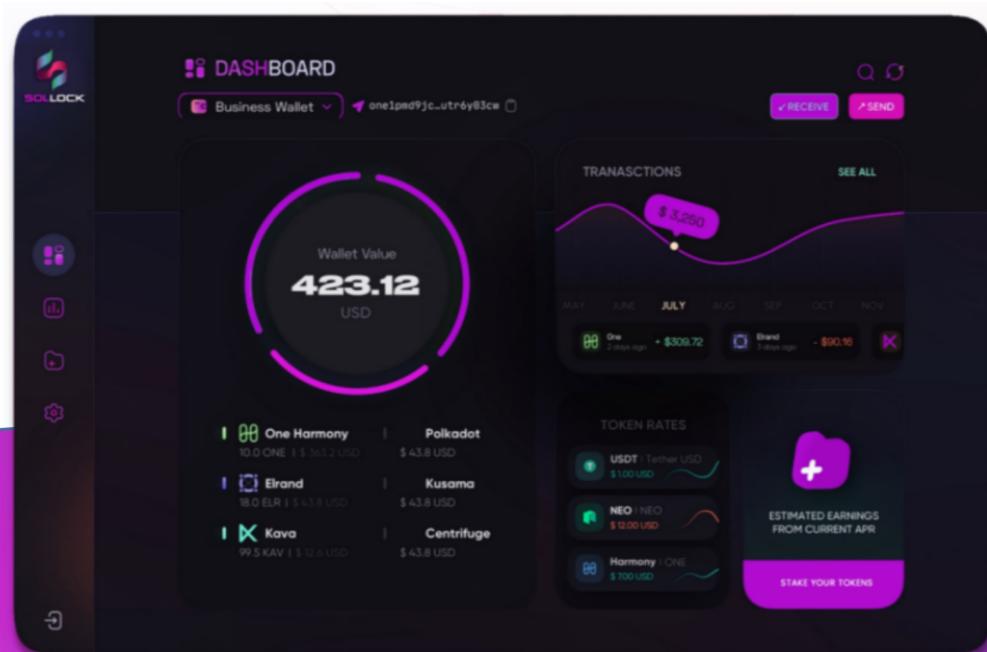

This screenshot shows a continuation of the SOLLOCK platform interface, likely a scroll-down view. It displays three more farms: "SLOCK-BTCB" (85.18%, \$1,280,086,17, Harvest: 0.00) and "SLOCK-BNBD" (85.18%, \$1,280,086,17, Harvest: 0.00). The interface includes buttons for "Deposit", "Withdraw", and "Harvest".

2.5. SOLLock SlockStake

There will be two type of staking on SlockSwap Flexible & Fixed Staking.

Flexible staking will be having a much lesser APY hence you can withdraw it anytime without penalty Flexible staking earn starts on after 24 hour period when its being deposited. Fixed staking are great for long term holders because SlockSwap gives users a much greater APY than flexible, But as the name suggest you can only redeem it on a certain period of time.

Fixed staking earning starts 15 hours after when its deposited redeeming it 1 hour before wont be having a penalty but redeeming it 1 hour after it has been deposited will be having a penalty. Fixed staking penalties Users who redeemed it early will be paying at least half of all of the earnings and cant stake on the platform for at least 3 days.

2.6. Tokens Lock & Vesting

SOLLock Team will Lock the Team Tokens and create a vesting schedule for Team Members with specified dates and token amounts. On this way Investors will be reassured that the Team and Developers will not dump their tokens on the market, effectively destroying the coin.

2.7. SOLLock Smart Contract Check

Smart Contracts that will be submitted on the SOLLock platform will be automatically tested for possible exploits and vulnerabilities as a result, any Smart Contracts that do not pass our initial inspection will not be allowed to be deployed on our SOLLock platform.

2.8. Liquidity Token & Funds lock

This is one of the most important features of the SOLLock system, funds that are projects raised on the SOLLock platform will be automatically distributed on based project allocation. Liquidity Tokens will be locked by default and the details about the lock-up can be viewed by the public on our Slocker dashboard.

In this manner this assures investors that the well-publicized scam or ruggpull will not happen.

2.9. Sollock Smart Contract

Smart Contracts that will be submitted on the SOLLock platform will be automatically tested for possible exploits and vulnerabilities as a result, any Smart Contracts that do not pass our initial inspection will not be allowed to be deployed on our SOLLock platform.

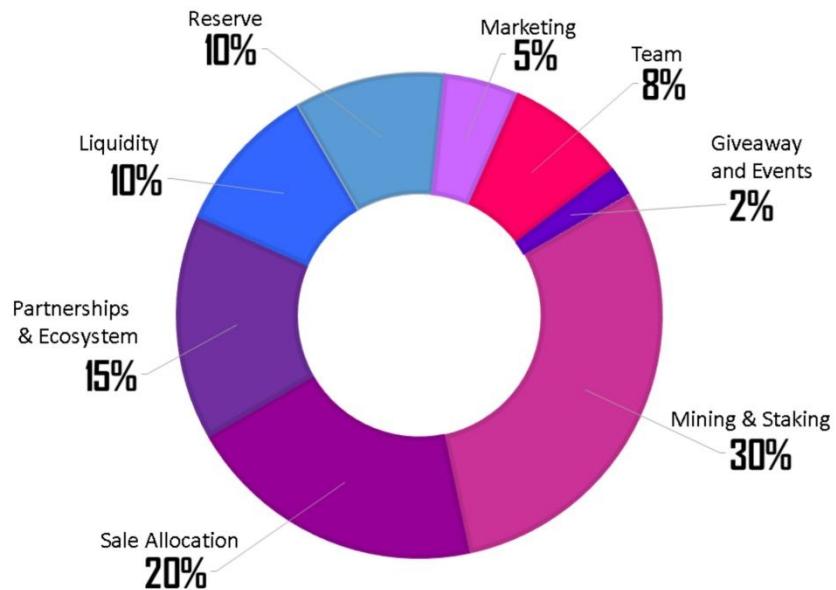

2.10. THE SLOCK TOKEN

SOLLock has its own native coin which is SLOCK. It is a reward token from the SPL environment.

Users who hold and stake SLOCK will be rewarded with a share of the platform's fees as well as the opportunity to participate in future projects hosted on our platform if the required amount is met.

2.11. SOLLock Token Allocation Breakdown

Mining & Staking: 30 million SLOCK

Sale Allocation: 20 million SLOCK

Partnerships & Ecosystem : 15 million SLOCK

Liquidity : 10 million SLOCK

Reserve : 10 M (LOCKED)

Marketing : 5 M

Team (vested) : 8 million SLOCK (Quarterly)

Giveaway and Events: 2 million SLOCK

3. Tokenomics

3.1. Vesting Schedule

Seed: 10% unlocked before listing, and then 15% after 3 months, then another 15% after 3 months, then followed for 20% after another 3 months, and lastly 40% after 3 months.

Private: 20% unlocked before listing, and then 25% after 2 months, then another 25% after 2 months, and lastly 30% after another 2 months.

Public: 10% unlocked before listing, and then 20% after 3 months, then another 20% after 3 months and lastly 50% after another 6 months.

Foundation Reserve and Team: Lock for one year, and then 25% release quarterly.

Marketing: 50% unlocked before listing, and then 25% release quarterly.

Mining & Staking: Locked Forever

Liquidity: Lock for one year and then 5% release monthly.

3.2. Pricing and Emission

Pricing and Token Emission

Phase	Sale Allocation	funds to be raised(\$)
Seed sale	10,000,000	400,000
Private Sale	6,000,000	420,000
Public Sale	4,000,000	320,000
TOTAL	20,000,000	1,140,000

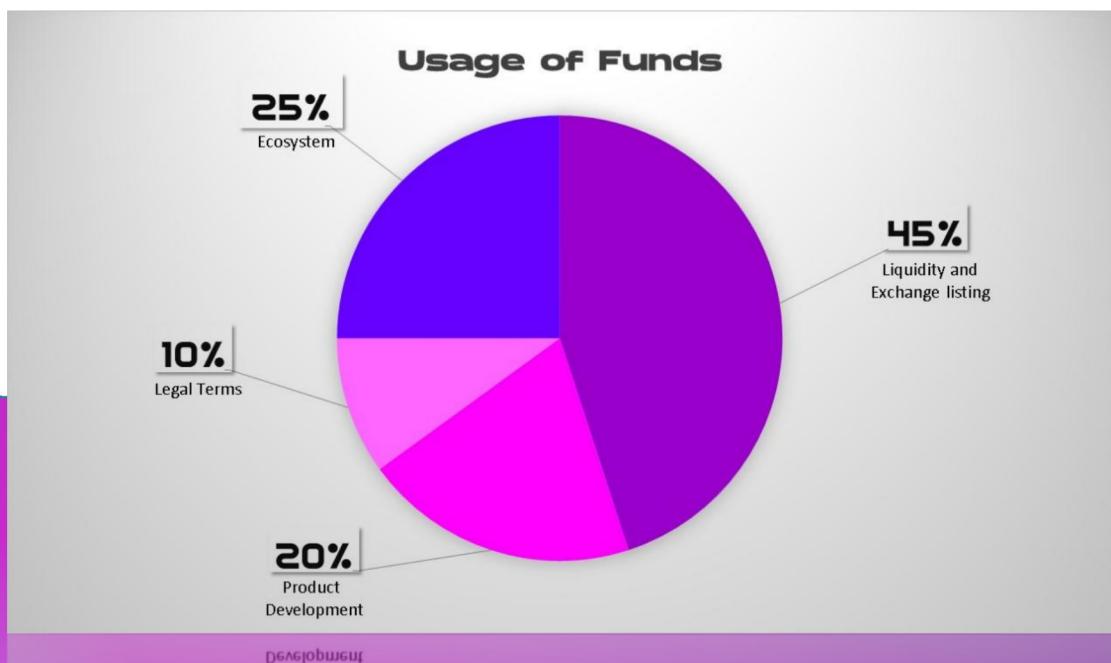

3.3. Usage of Funds

Product Development 45 %

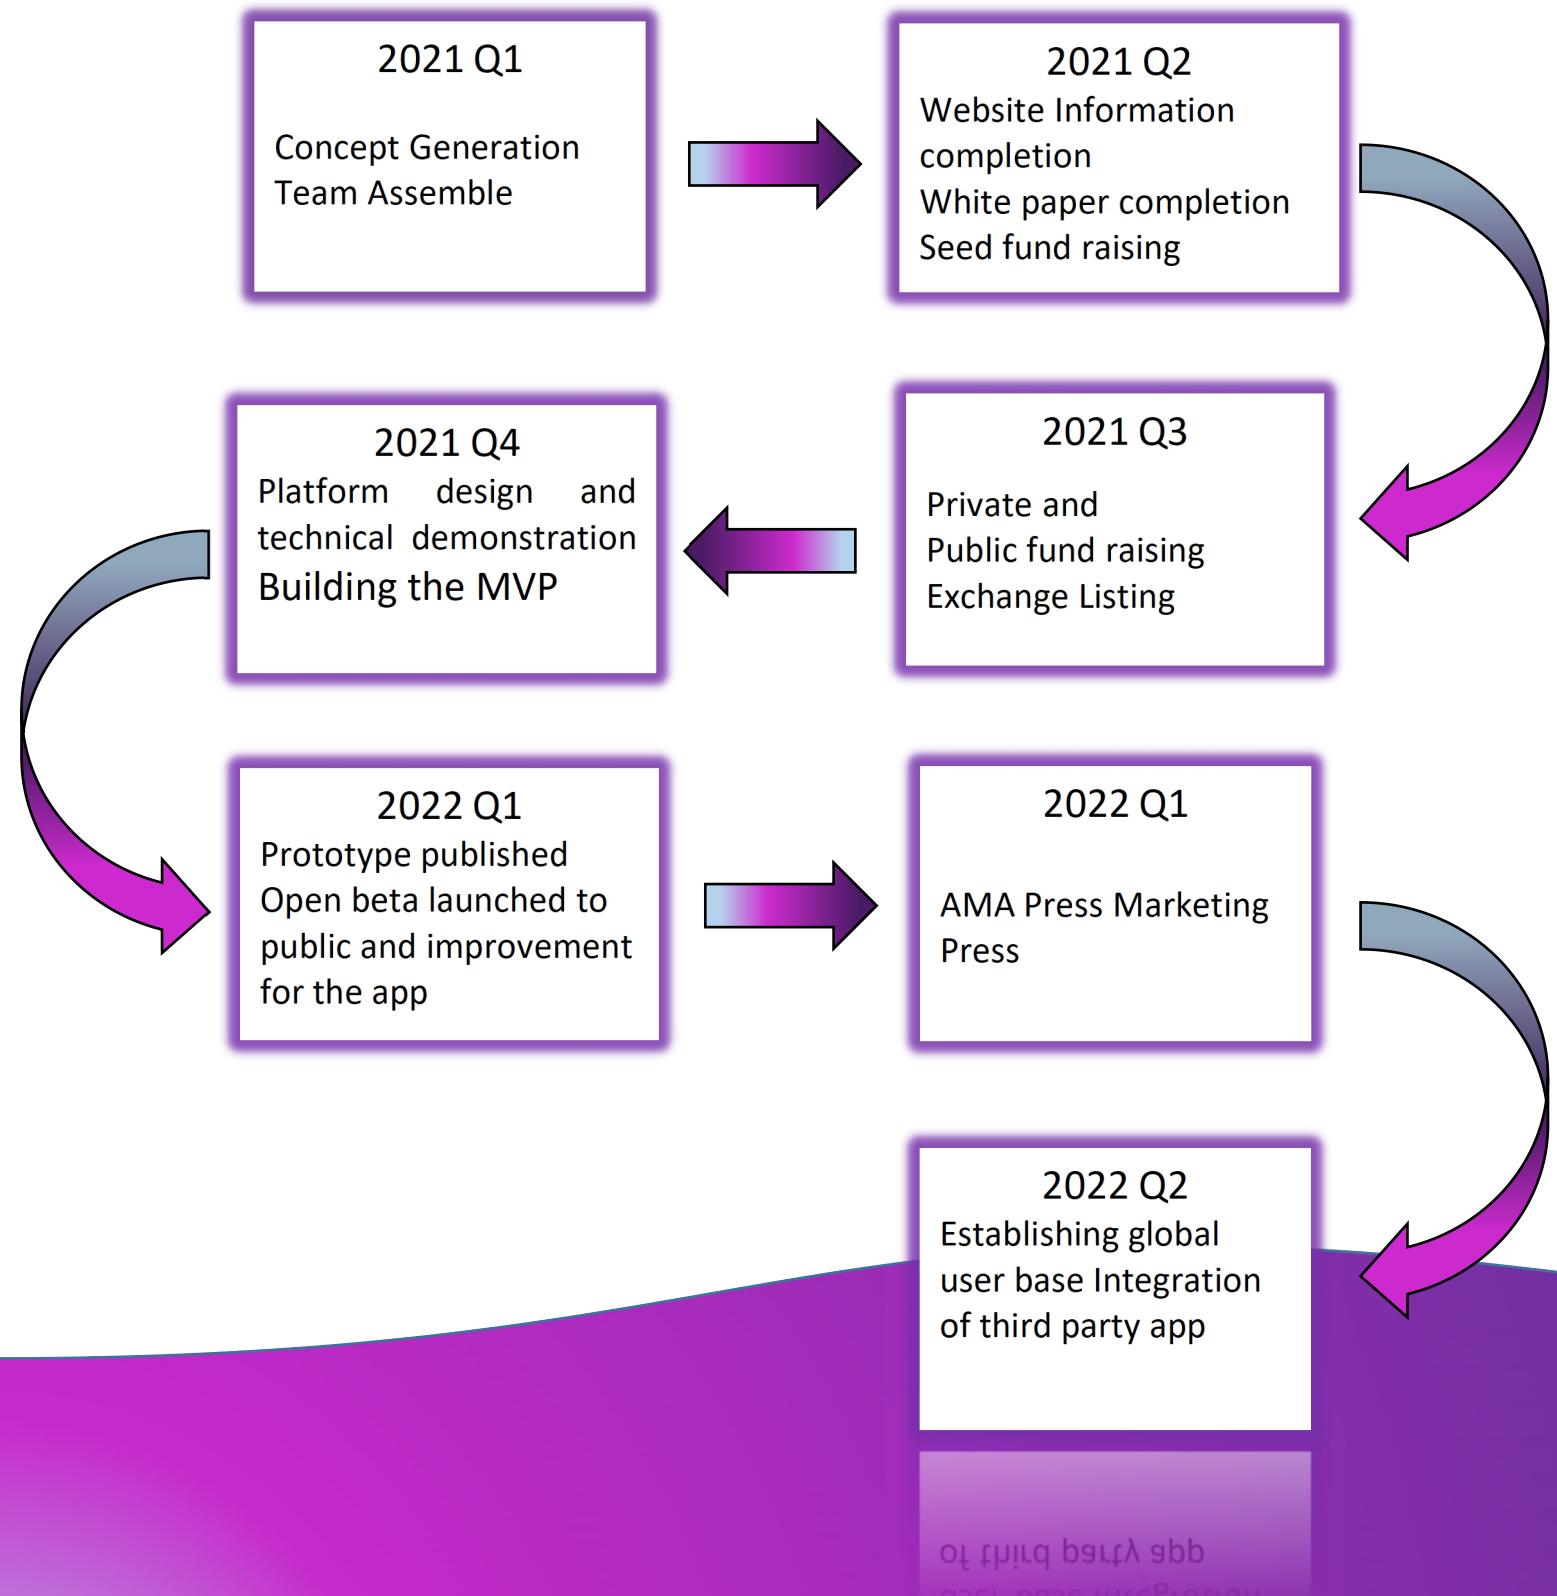

Ecosystem 20 %

Legal Terms 10 %

Liquidity and Exchange Listing 25 %
